Allow Additional Time for Multiple Line Item Orders Over 150 Total Pieces Round, or 50 Total Pieces Shape - or Combinations Thereof - Call For Quote

**NOTE: THE DAY OF RECEIPT OF THE ORDER IS NOT CONSIDERED
A WORK DAY**

WILL SHIP TODAY

ORDER MUST BE ENTERED BY NOON E.S.T. - and confirmed by phone

Up to Ø 25 mm body

M2 steel only;

Catalog Rounds - up to 9 pieces with maximum of one alteration

Catalog Shapes - (flat round, oblong, square and rect.) up to 4 pieces/1 alteration

Locking Methods - single and double flats

Items not available for this service

Knob Style Punches

Coatings/Treatments

Dowel Slots/Full Length Body Flats

Durable Line (catalog pages 24 & 25)

Extrusion Line

Pilot Punches over 92 mm "L"

Advise Shipping Method - if not specified will ship FedEx or UPS next day delivery

A.M. or Saturday delivery if available

Additional Cost -

Round items - add 100% to list price (no minimum charge)

Shape items - add 50% to list price (no minimum charge)

WILL SHIP TOMORROW

ORDER MUST BE ENTERED BY NOON E.S.T. - and confirmed by phone

Same limitations as "Will Ship Today", PLUS

Up to 19 piece quantities

Up to three alterations

All locking methods available

Additional Cost - add 25% per line item (no minimum charge)

Forms

Triangles & Trapezoid Forms

Keyhole & Teardrop Forms

Knock-Out Forms

In cases where clearance per side ($\emptyset$) is .08 $\emptyset$ or less we will break the sharp corners to eliminate interference, when punches, and/or guides and dies are ordered together.

VIEWS: Shown as in-die position. This is reflected view for punch and guide, plan view (thru cutting end) of die button. See page 39 for details.

CENTERING: Forms are centered to the shank or body as shown. Exception being forms Z09 and Z15, will not be centered on P due to clearance.

When Ordering Forms Specify: Qty Mat. Type Code L2/L Form P W R Locate

Ex. 1 thru Ex. 33 tips are available on all standard catalog range punches. (Head type, Headless and Bal-Lok Solid and Retracto.)

Use caution when using Retracto type in relation to point length (P) and smallest point Ø (P). Some tips are not compatible with Retracto use. (Example # Ex. 31)

When no B (point length) is called out, the standard B for the type punch selected will be supplied. All Ultra Precision style must call out B length as there are more than one standard available for this style punch.

Common type of extrusion punches are shown above and can be configured on any style punch as called out by the customer. Configurations of other styles can be furnished upon receipt of customer drawings with specified tolerances.

Kit includes 1 each – set screw
– spring
– pin

Components available as kits or separately.

Ejector Springs and pins are cut to length at assembly.

Alterations beyond standard ranges listed in the catalog that can be accomplished for a slight additional charge. Alterations beyond those listed consult factory. Standard catalog tolerances are used for all alterations unless otherwise specified

RL = Reduce Length (L)

- Punches- Stock is removed from the point end, also reducing the point length (B)
- Die Buttons-Headless (Excluding Bal-Lok). Stock is removed from the Co-bore end. Head Type with Co-Bore relief. Stock is removed from the I.D. end shortening the (B).
- Taper dies "RL" will not reduce land length

RLB = Reduce length maintain "L₂"

PRL = Precision Reduced Length

- Same as "RL" plus "L" is held to $\pm .02$

RD = Reduced Diameter of Shank or Body

- Max standard reduction 1.0 (Further reduction consult factory). "H" remains the same.

RP = Reduce "P" on Round Punches

- (See chart for standard ranges or consult factory)

RW = Reduce "W" on Shape Punches

- (See chart for standard ranges or consult factory)

RT = Reduce Head Thickness

- Stock removed from the top of the head (Reduces "L")

PRT = Precision Reduced Head Thickness

- Same as RT. "T" is held to $\begin{smallmatrix} +.02 \\ -.00 \end{smallmatrix}$

RH = Reduce Head Diameter

- Max standard reduction 1mm (Further reduction consult factory)

LPC = Longer Point Circular

- Solid Punches Only
- Specify "B" length up to 44 mm
- Minimum body length shown in catalog (Further reduction consult factory)

LPW = Longer Point Shape

- Solid Punches Only
- Specify "B" length up to 44 mm
- Minimum body length shown in catalog (Further reduction consult factory)

AP = Alter "P" on Round Dies

- Standard dies up to .5 over listed range (Greater increases require "AR")
- Taper dies (See chart)

AW = Alter "W" on Shape Dies

- Standard dies up to .5 over listed range (Greater increases require "AR")
- Taper dies (See chart)

AR = Alter Relief on Co-Bore Dies

- Round Relief Only

AB = Alter Land "B" Length on Die Buttons

- Reduction is from I.D. end shortening "L"

IB = Increase Land "B" on Die Buttons

- Taper Dies {1.3-6.0 (6.0) max}
- {P or W 6.1 and over (13.0) max} [Longer consult factory]
- Co-Bore Dies (Consult factory)

SK = Slug Keeper

- Slug Retention System

AT = Alter Taper

VIEWS

All views are shown as in die position view. This is the reflected (thru shank) view for the punch and guide, and is the plain view (thru I.D. end) for the die button (matrix). This view is consistent whether for headed and press fit items or Bal-Lok items.

ORIENTATION

On Headed and Press Fit punches, die buttons and guide bushings the standard keying location is at 0° (on the long side of the standard shape). Custom locations are available and called out as the number of degrees counter clockwise from 0° (**Example: LM1@45°**)

BAL-LOK Punches and Die Buttons.

The standard ball-seat keying location is at 90°, (in the end zone if looking at a football field). Custom locations are available and called out as the number of degrees counter clockwise from 0° (**Example: BS@45°**)

Durathane Open End Punch Strippers

Ordering Example:
Quantity Description
6 05-45

All are oil and solvent resistant 95A durometer. All provide greater pressures than equal sized steel die springs. All are easy to install and dampen vibration. Pop-On's closed end gives more positive stripping and full stripping around periphery of punch point. Open end more economical.

Pop-On Closed End Punch Strippers

OUTLAST THE OTHERS...

The Benefits

CRYOGENICS process forms very fine carbide particles throughout the material and increases wear resistance.

CRYOGENICS treatment results in a tougher substrate further increasing part life through reduced impact failures.

CRYOGENICS reduces internal stresses or completely eliminates part movement during the machining process.

CRYOGENICS requires only one treatment as it is a through part molecular change and not a surface layer. The results last the life of the tool. Sharpening will NOT eliminate the benefits.

CRYOGENICS is an exclusive combination of deep cryogenics (149C) treatment plus an additional temper during the heat- treating process. This results in internally altering the entire structure of the steel creating a dense and uniform molecular structure. **CRYOGENICS** is not a surface treatment! **CRYOGENICS** increases internal bonding while releasing internal stresses created by previous machining processes. Computer-controlled gradual cooling and warming cycles eliminate the possibility of thermal shock and prevent parts from becoming brittle.

Tin

Titanium Nitride

A (PVD) process of placing a thin coating of Titanium Nitride 1-5 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 2300 Vickers
- * Dry coefficient of friction versus steel .4
- * Thermal stability up to 600 C
- * Appears gold in color

TiAlN

Titanium Aluminum Nitride

A (PVD) process of placing a thin coating of Titanium Aluminum Nitride 2-5 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 3000 Vickers
- * Dry coefficient of friction versus steel .6
- * Thermal stability up to 700 C
- * Appears grey

TiCN

Titanium Carbonitride

A (PVD) process of placing a thin coating of Titanium Nitride 1-5 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 3000 Vickers harder than Carbide"
- * Dry coefficient of friction versus steel .3
- * Thermal stability up to 400 C
- * More wear resistance than TiN
- * Appears brown or light blue.

P-41

A (PVD) process of placing a thin coating 1-8 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 2000-2800 Vickers
- * Dry coefficient of friction versus steel .1
- * Thermal stability up to 300 C
- * More wear resistant than TiCN
- * Specially for non ferrous materials
- * Appears black

Porter Plus (PPC)

A (PVD) process of placing a thin layer of this special coating (2-5 microns thick) over the working area of the punch.

Benefits

- * Surface hardness of 3200 Vickers
- * Dry coefficient of friction versus steel .35
- * Thermal stability up to 1100 C
- * More wear resistant than TiCN
- * Appears blue-grey

P-90

A (PVD) process of placing a thin coating 6-8 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 3800 Vickers
- * Dry coefficient of friction versus steel .12
- * Thermal stability up to 400 C
- * More wear resistant coating
- * Appears silver-grey

PZRN

A (PVD) process of placing a thin coating 2-10 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 2800 Vickers
- * Dry coefficient of friction versus steel .5
- * Specially for non-ferrous materials
- * Appears yellow-gold

TiCNMP

A (PVD) process of placing a thin coating 2-4 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 3000 Vickers
- * Dry coefficient of friction versus steel .2
- * Specially for Galling issues in steel
- * Appears bronze

CRN

A (PVD) process of placing a thin coating 2-4 microns thick over the working area of the punch.

Benefits

- * Surface hardness of 2300 Vickers
- * Dry coefficient of friction versus steel .3
- * Specially for forming punches
- * Appears silver

Policy

Porter Precision Products guarantees its products to meet catalog specifications which are interchangeable and equivalent to I.S.O. standards. Print items and special description call-outs will be manufactured to the customer's specifications. No other warranties are expressed or implied.

All dimensions not specifically toleranced will be manufactured to industry (our Catalog) standards, regardless of the decimal place call-out. To eliminate misunderstandings, include tolerance charts on your prints or specifically tolerance critical dimensions.

Steel type is to be specified by the customer. If not specified, we will supply the first material listed in the catalog. It is always best to include your material choice in the part call-out as shown in the ordering examples.

Terms & Conditions

Prices- Net each and subject to change without notice.

Minimum Order Charge- There is no minimum order charge on manufactured items.

Terms-Net 30 Days, F.O.B. Shipping point

we also accept American Express, Master Card, and Visa

Credit- Orders are subject to the approval of our credit department. To expedite new accounts, furnish bank reference and three supplier references.

Returns- Credit claims for our manufactured items must be made within 45 days of shipment date. Stock blanks are returnable for credit less a 25% restocking fee. If they are exchanged for items of equal or greater value they can be returned for full credit. All items altered by us to the customer's specifications are the property of the buyer and are not returnable unless they do not meet catalog or print tolerances. Any item that has been altered by the customer is the said customer's responsibility and is for no reason returnable.

Over/Under Shipments- Manufactured products can vary up to 10% of the quantity ordered depending on the complexity of the part. If no variation is acceptable this information must be supplied to us at the time of quoting.

Cancellation- The customer will be responsible for a pro-rated charge to cover any work completed prior to cancellation.

Infringements- Customer shall assume all responsibility and undertake the defense of all lawsuits for infringements on patents brought against Porter Precision Products for the manufacture of products named in an order when said products are made according to drawings, samples, and/or descriptions that have been supplied by the customer.

Items supplied but not manufactured by us- All policies/terms & conditions set forth by the manufacturer of said items are applicable. Contact Porter for information regarding various policies.
